Trusted Name In Fishing Nets

Bird Nets

There is major problem of Pigeons in many areas now a days. They get easy access from open plumbing ducts & find good nesting area on the pipes & parapets inside the duct. They make nests & lay eggs there. There is a big problem of bird droppings inside the ducts which can not be easily cleaned & emits a very foul smell. Many pigeons die in the ducts causing large presence of maggots & other insects in the duct area. Pigeons nest on top of ACs & release a type of fungus that can cause LUNG DISEASES. We have developed a special net to get rid of this menace caused by pigeons without hurting or killing them. We offer Nylon, Polypropylene, & other bird protection nets.

HAMMOCK NETS

We are proud to introduce ourself as manufacturers of Hammocks. Constant improvement in quality Weaving & Stitching by Highly Skilled Work Force & rich experience have woven our success. We assure you our Rates are most competitive and our Quality is up to International Standard. We also undertake development of new colour combination, design, size, of your choice.

Mosquito Nets

With about 40% of the world's population at risk of malaria today, prevention by using mosquito nets is an important weapon to avoid this life-threatening disease. Especially at night, when most malaria-carrying mosquitoes bite, a net can be a life-saving barrier between a sleeping person and the mosquito. By treating a net with insecticide, its effectiveness dramatically improves. A long-lasting insecticide-treated net is factory pre-treated and remains effective during its entire life span.

Construction Nets

Heavy duty safety nets offer fall protection for construction workers; debris containment liners keep traffic passing below safe from falling objects during overhead construction. We offer protective nets for personnel working on bridges and debris liners to catch small pieces of concrete.

Agricultural Nets

Our sophisticated manufacturing equipment, rich experience and time-honored reputation in the manufacture and marketing of nets have made possible the development of new type of netting with ultra-reliable longitudinal and lateral stability. This revolutionary net is knitted from high quality fibers with a structure similar to that of monofilament, thus enhancing the resistance of the net to abrasion and tearing.

Sports Nets

Golf course practice net & driving range netting, golf training aids, cricket & football practice net, swimming pool & sports hall netting, backstop & protective perimeter netting, tennis court netting - we can supply and install any type of sport netting application.

Ropes

We offer excellent chemical resistant and good frictional resistance ropes. Further our ropes characterize minimum elongation, good heat resistance and negligible water absorption. As we offer products after careful consultation with our R & D team which is constantly interacting with the fishing community to bring out the best product. We offer ropes in all sizes with high strength and flexibility so as to prevent slippages and breakages. The leading dealer in Nylon, Poly Propylene & HDPE ropes. 3 strand ropes are widely used in Construction industry, Heavy industry, shipping industry and in defense & Aviation. These ropes are made on the latest & modern machinery, using latest technologies and hence possess excellent standards & properties. Diameter 4mm to 48mm & standard coil length of 220 metres
